Senior Full-Stack Developer (.NET / Next.js)

Location	Brisbane CBD, QLD (hybrid – 3 days in office)	**Reference**	NLG-2026-114
Employment	Full-time, permanent	**Salary**	$140,000 – $160,000 + super
Reports to	Engineering Manager	**Closing date**	31 October 2026

ABOUT US

Northbridge Logistics Group runs freight, warehousing and parking operations across Queensland. Our in-house digital team of 12 builds the booking, payments and operations platforms that our customers and 600+ staff use every day.

THE ROLE

We're looking for a senior developer to take technical ownership of our customer booking platform and help move the remaining legacy systems to Azure. You'll work across the full stack, from the Next.js front end to the .NET API and Azure SQL database, and guide junior developers along the way.

KEY RESPONSIBILITIES

- Design, build and maintain features across our Next.js front end and C# / .NET 8 APIs.
- Own the integration with our payment provider (Stripe), including refunds, webhooks and reconciliation.
- Lead migration of legacy on-premises applications to Azure Container Apps and Azure SQL.
- Maintain and improve CI/CD pipelines in GitHub Actions.
- Automate internal business processes using Power Automate and SharePoint.
- Review code and mentor junior developers.
- Work with business stakeholders to turn requirements into well-scoped work.

ESSENTIAL CRITERIA

- 5+ years' commercial experience as a full-stack or back-end developer.
- Strong C# and ASP.NET Core skills, including building REST APIs.
- Commercial experience with React or Next.js and TypeScript.
- Solid SQL Server / Azure SQL skills: schema design, queries and performance tuning.
- Hands-on experience deploying and running applications in Microsoft Azure.
- Clear written and verbal communication with non-technical stakeholders.

DESIRABLE CRITERIA

- Experience integrating payment platforms (Stripe or similar).
- Microsoft certifications such as AZ-204 or PL-400.
- Experience with Power Platform, SharePoint or Microsoft 365.
- Docker and containerised deployments.
- Experience mentoring or leading other developers.

WHAT WE OFFER

- Hybrid working and flexible hours.
- $2,000 annual training budget plus paid certification exams.
- Additional leave day for your birthday.
- Modern stack and a team that ships to production weekly.

HOW TO APPLY

Send your resume and a cover letter (max. 2 pages) addressing the essential criteria to **careers@northbridge-example.com.au**, quoting reference **NLG-2026-114**. Applications close 5:00 pm AEST, 31 October 2026.
