Talent Acquisition Manager
Coral Reef Logistics Pty Ltd
Level 3, 220 Flinders Street
Townsville City QLD 4810

Re: Application for Senior Software Developer (Ref: CRL-2026-118)

Dear Ms Tran,

I am writing to apply for the Senior Software Developer position advertised on SEEK on 28 September 2026. With seven years of experience building cloud-hosted business applications and a Bachelor of Information Technology from Northgate Coast University, I am confident I can contribute to your digital freight platform from day one.

In my current role as Software Developer at Bluewater Systems (2021 - present), I lead a team of four developers maintaining a fleet-tracking application used by more than 1,200 drivers across Queensland. Key achievements include:

- Migrating a legacy on-premises system to Azure App Service, cutting hosting costs by 35%.
- Building a C# minimal API and Next.js dashboard that reduced dispatch processing time from 12 minutes to under 3.
- Introducing automated testing and CI/CD pipelines, lifting deployment frequency from monthly to weekly.

I am particularly drawn to Coral Reef Logistics because of your commitment to regional supply chains and your recent investment in real-time tracking. My experience with SQL Server, Azure Functions and integration with third-party carrier APIs aligns closely with the requirements listed in the position description.

I have attached my resume and two referee contacts for your consideration. I am available for interview at your convenience and can commence with four weeks' notice. Thank you for considering my application; I look forward to hearing from you.

Yours sincerely,

Daniel James Marsh
